NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: a b c -

```
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
Ochar item;
  struct Node* next;
  struct Node* prev;
// You are using GCC
struct Node* tail=NULL;
void insertAtEnd(struct Node** head, char item) {
  struct Node* newnode=(struct Node*)malloc(sizeof(struct Node));
  newnode->item=item;
  newnode->next=NULL;
  newnode->prev=NULL;
  if(*head==NULL)
    *head=tail=newnode;
```

```
}%
2010 else{
       tail->next=newnode;
       newnode->prev=tail;
       tail=newnode;
     }
     printf("\n");
    //type your code here
   void displayForward(struct Node* head){
     struct Node* temp=head;
     while(temp!=NULL){
       printf("%c ",temp->item);
      temp=temp->next;
     printf("\n");
   void displayBackward(struct Node* tail){
     struct Node*temp=tail;
     while(temp!=NULL){
       printf("%c ",temp->item);
       temp=temp->prev;
     }
     printf("\n");
                                                  240701381
   void freePlaylist(struct Node* head){
   struct Node* temp=head
     while(temp!=NULL){
       struct Node* nextnode=temp->next;
       free(temp);
       temp=nextnode;
     head=NULL;
     tail=NULL;
   }
   int main() {
     struct Node* playlist = NULL;
    char item;
     while (1) {
```

```
240701381
                                                   240701381
   scanf(" %c", &item);
    if (item == '-') {
       break;
    insertAtEnd(&playlist, item);
  }
  struct Node* tail = playlist;
  while (tail->next != NULL) {
    tail = tail->next;
  }
  printf("Forward Playlist: ");
  displayForward(playlist);
  printf("Backward Playlist: ");
  displayBackward(tail);
  freePlaylist(playlist);
  return 0;
}
                                                                       Marks: 10/10
Status: Correct
